

COVID-19 PREVENTION PLAN

EMPLOYEE RESPONSIBILITIES

While your managers and supervisors do play a role in making sure that the COVID-19 Prevention Plan is effective, you and your coworkers also have a role in implementing the plan. You can keep in compliance with your company's COVID-19 Prevention Plan by doing the following:

- Inform your supervisor if you are feeling sick and follow all return-to-work policies and procedures after you have recovered. Do NOT go to work if you are sick.
- Additionally, you should inform your supervisor about any close contact that you have had with people who have been diagnosed with COVID-19.
- Attend all COVID-19 and pandemic-related training and safety meetings. To make sure that you're accounted for, remember to sign off on attendance sheets and lesson signoffs.
- Follow all company policies and procedures for social distancing during outbreaks.
- Follow all company policies and procedures for face coverings.
- Practice proper sneezing and coughing etiquette by using a tissue or your elbow. Remember to wash your hands after throwing tissues away.
- Avoid touching your face with unwashed hands.
- Practice proper hand hygiene by washing your hands with soap and water for a minimum of 20 seconds. If soap and water are not available, use a hand sanitizer with at least 60% alcohol. Do NOT use hand sanitizers that contain methyl alcohol.
- If applicable, wear provided personal protective equipment. Equipment may include gloves, goggles, or face shields.
- Become familiar with your company's policies and procedures for the voluntary use of N95s. Please note that N95s can be requested for voluntary use by any employee.
- Cooperate with all company COVID-19 investigations.
- And monitor yourself for symptoms before going to work.

CENTER FOR DISEASE CONTROL (CDC) AND COVID-19 VACCINATIONS

Vaccines have been made publicly available under an Emergency Use Authorization (EUA) from the Food and Drug Administration. Currently, the CDC states, "All COVID-19 vaccines currently available in the United States are effective at preventing COVID-19 as seen in clinical trial settings. COVID-19 vaccination helps protect people from getting sick or severely ill with COVID-19 and might also help protect people around them. Some people who are fully vaccinated against COVID-19 will still get sick because no vaccine is 100% effective. Experts continue to monitor and evaluate how often this occurs, how severe their illness is, and how likely a vaccinated person is to spread COVID-19 to others."

If you have questions regarding available vaccines, please speak with your medical physician.

CONCLUSION

To review, your company's COVID-19 Prevention Plan takes all employees to be effective. You can help your company make sure that the plan is effective by following all of your company's policies and procedures for COVID-19. If you have any questions about these practices, please speak with your supervisor.
